

Electrically height adjustable to suit all users

IEC 60601-1 Certified Power System

Maternity Carts

Compact and Integrated Care at the Bedside

By combining your CTG machine, transducer kit / telemetry system, and digital maternity software, our workstation brings all essential tools into a single, mobile footprint. Staff can perform real-time foetal monitoring and clinical documentation directly at the bedside, eliminating delays and duplication.

Enables clinicians to bring both monitoring and documentation directly to the patient, supporting person-centred care, eliminating duplicate documentation and paper systems and enabling efficient bedside care with minimal equipment.

certified
power system**

Safe and reliable battery power

Designed as a fully mobile solution, we utilise the latest battery technology enabling you to monitor battery health and the number of charge cycles to ensure a long service life.

Our carts are designed and manufactured with patient safety as a top priority, with the power system certified to IEC 60601-1 standards, a widely recognised benchmark for the safety of electronic devices in medical environments.

Ergonomic & fully adjustable

Set the cart to the user's preference quickly, with a screen mount that can be adjusted to remove obstruction from the patient's eye line or to share information easily with colleagues.

Features

- Electrically height adjustable
- Integrated on-board battery (486Wh)
8 hours+ of PC & screen operation
Power system conformant to IEC60601-1 standards
- Integrated battery power gauge
- Integrated charging circuit
- Durable, chemical resistant, and antibacterial compact laminate worktop
- Twin wheel castors and handles for easy manoeuvrability
- 2x shelves below worktop for maternity equipment

Monitor mounts

Adjustable
monitor arm

Articulated
monitor arm

Optional extras
