Wayfinders

The Wayfinder enables screens to be securely placed in any open plan healthcare environment, allowing information to be displayed to patients or staff for map display and way-finding purposes.

These free standing units are ideal for areas accessible to the general public and large groups of people such as reception spaces, library areas, waiting rooms and corridors.

Available in single and dual screen configurations, the stands are customizable to your requirements featuring a range of standard color finishes, anti-microbial paint finishes and custom branding.

- **Modern design**
Stylish and elegant solution made to suit your way-finding requirements.
- **Tamper proof**
Can be bolted to the floor for added security.
- **Easily cleanable**
Infection control friendly design, with an antimicrobial finish and an easy to clean surface, preventing accumulation of dirt and germs.
- **Make it your own**
Include custom branding such as NHS Trust logos, hospital names or anything you like!
- **Cable management**
Complete internal cable management creates an 'all-in-one' solution.
- **Built to last**
Manufactured with high quality durable steel construction for long-term use.
